### Comment:

Winds light from the SE at start moving to NE and finally N 12k  
Course shortened to 5 short.  
Starship tracking didn't show but it was "activated".

Replay shows Starship "ACTIVATED" on the mooring but stopped when it reached the "Termination Zone". When boats start they activate the zone or the zone is activated 15 minutes after the scheduled start.

The boats start times were updated for tracking, but unfortunately I overlooked the date, so the results thought all boats started last week. It was corrected but unfortunately it does change the tracking, hence all boats were visible at the start of tracking and Starship was deactivated when she reach the termination zone.
